Preface

Please, note this is only for demonstration purposes. The goal is not to invent or develop something (also not using proper grammar and spelling). There is a bug found and in order to present it in a fast and understandable way, this is done

see: <https://github.com/quarto-dev/quarto-cli/issues/5237>

This is a Quarto book.

Part I

Part has no qmd file

1 Inp - Trial - 0

when talking about found -> refer to cross-referencing this part here is loaded as a regular **CHAPTER** qmd file

Further check Chapter [2](#) – should be found chapter [3](#) – should be found

2 Inp Chap Trial_0

Here is some more text

3 Inp Introduction Trial_0

Here is some more text

Part II

Inp - Trial - 1

when talking about found \rightarrow refer to cross-referencing this part here is loaded as a **PART** qmd file

Further check Chapter 4 – is found chapter 5 – is found

4 Inp Chap Trial_1

Here is some more text

5 Inp Introduction Trial_1

Here is some more text

Part III

Inp Chap Trial_2

Here is some more text

Part IV

Inp Introduction Trial_2

Here is some more text

6 Inp - Trial - 2

when talking about found -> refer to cross-referencing this part here is loaded as a **PART** qmd file

Further check `?@sec-chap_1_Intro_Trial_2` – is not found chapter `?@sec-chap_1_Abc_Trial_2` – is found

We see multiple things here 1) A qmd file is set as part file 2) First the introduction is loaded, it contains the references, i.e., the id definitions for the chapters 3) The qmd file that invokes the reference using (**name_Of_Reference?**) comes in the chapter (after part) section in the yml file 4) Strangely, the first chapter defined in the intro.qmd file fill not be found. However, the second chapter defined in the intro.qmd fill be found for cross-ref.
